

The National Science Day

The National Science Day is celebrated in India on 28 th February each year to mark the discovery of the Raman effect by Indian physicist Sir C.V Raman.

This day was commemorated with an online display of charts, posters and projects on different Science topics by students. Some ignited minds also demonstrated few Science experiments showcasing their scientific aptitude.

Being mindful of the current pandemic situation, the students expressed a deep concern for the wellbeing of their fellow classmates. Therefore the teachers showed the students videos to give tips to prevent Covid infection.

The students also displayed their gardening skills to express their gratitude to nature as a way of stress release during the lockdown.

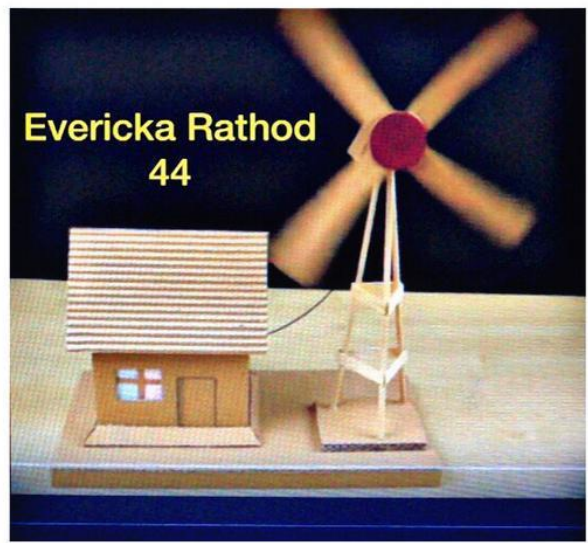

Overall ,the Science Day was a novel experience to one and all.
