

***Apostolic Carmel Junior College  
embarks on a journey of discovery and wonder on their  
Educational Field Trip.***

**23<sup>rd</sup> June, 2023:** The students of Std XII Arts, XII Science and XII Commerce were taken to Nehru Science Centre and Discovery of India Museum for their field trip. The purpose of this trip was to integrate learning with fun.

The students and accompanying teachers left the campus with great excitement in the air. The anticipation of the day ahead added to the fervour.

At Nehru Science Centre, one of the largest interactive science centre in India, the students were introduced to various scientific concepts and experiments like the Sparkling High Voltage, Science on a Sphere, Motion Simulator Ride, 3-D Science show among others. The students watched and participated in each experiment and show conducted with curiosity and awe.

The Discovery of India Museum traced every aspect of the artistic, intellectual and philosophical attainment of India through the ages. This museum helps in depicting the true identity of our country India; a much needed area of knowledge for GenZ.

By evening the students returned to college with a sense of fulfillment of a day well spent with their friends and teachers because they had lived up to the famous quote by Confucius, “I hear and I forget, I see and I remember. I do and I understand”.
