

Apostolic Carmel Junior College

‘Best Out of Waste Competition’

“Recycling things is like magic that turns ordinary things into extraordinary”

27th September ,2023: In the light of the above quote , **Prof. Trini Tauro , Prof. Armine Bhagvager and Prof. Clicia D’silva** conducted the “ **Best out of waste competition”** as part of Environmental Studies for all the students belonging to **Standard XI and Standard XII.**

The aim of conducting this competition was to understand the importance of preserving the environment and learn more about sustainability. This activity also helped to create love for the environment by transforming waste into recyclable items.

The students creatively and innovatively prepared models from reusable and recyclable materials ranging from newspapers, bottles, cardboards, ice-cream sticks etc. It was heart-warming to see how day-to-day waste material was put to use in a constructive manner.

All in all, it was an exciting and fun-filled activity, bringing about a sense of love and responsibility for the environment.
