

Today's digital age

Today the students had an engaging and informative session led by Sir Swapnil, focusing on the importance of being responsible citizens in today's digital age.

During the session, students gained valuable insights into the pros and cons of various social media applications, enabling them to make informed decisions about their online presence. Additionally, they were educated about the presence of cybercrimes, including topics such as fake accounts, hacking, stalking, photo morphing, online gambling, fake news, cyber terrorism, and cyberbullying.

A highlight of the session was the discussion on how to effectively deal with cyberbullying, equipping students with practical strategies to address and prevent such incidents.

By raising awareness about digital citizenship and providing students with the necessary knowledge and tools to deal with the online world responsibly, we aim to foster a safe and positive digital environment for our students.
