

Junior College -Department of Arts (Economics)

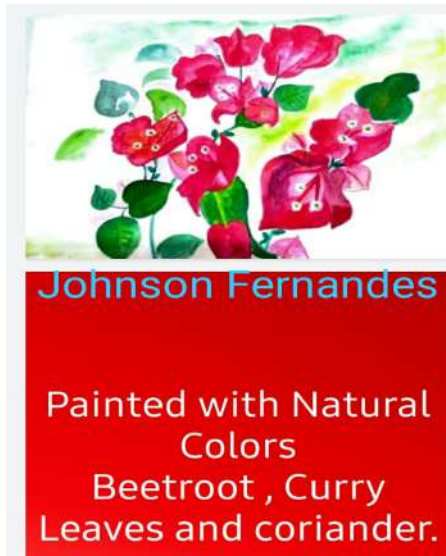

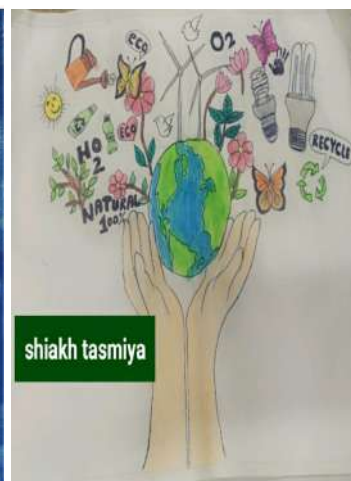

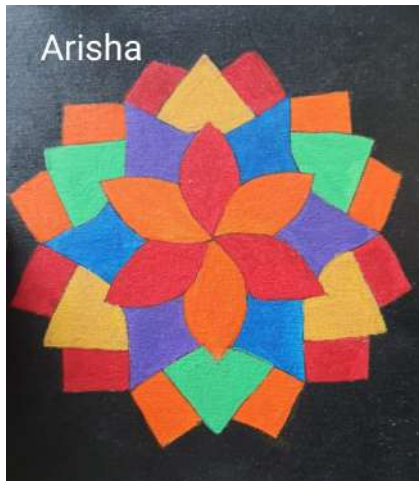

ECO-FRIENDLY ART ACTIVITY - STD XII ARTS

Concept - Sustainable Living

The increasing prevalence of environmental degradation has emerged as one of the most prominent urban problems in today's time. As society has become more conscious towards our environment, promoting sustainable living is imperative.

This holds true particularly today, in a world reeling under the effects of the COVID-19 pandemic, where humanity has been brought to its knees, and compelled to relook the choices we make. Artists, through the power of their imagination and tools are drawing attention to the undeniable reality of environmental damage, while emphasising the need for a sustainable lifestyle.

Students contributed in most resourceful and efficient ways .

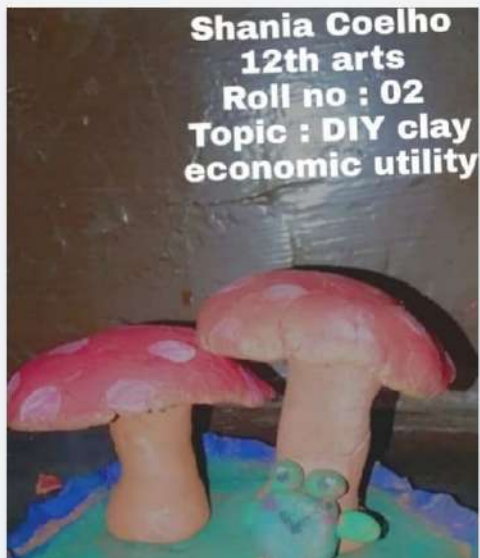

Leander Pereira
Standard XII Roll no. 22
Economic Activities for term 2
1) Eco-Friendly Art
