

# Diwali Project

## "How to face the third wave in COVID-19 Pandemic times".

The Headmistress Sr.Marisa A. C. thought of an idea to give a project to the students of class 5th to 10th.

At a time when India has barely put behind the horrors of the second wave of Covid-19 pandemic, Maharashtra has sounded alert for the third wave. As of October 2021, COVID-19 infection rates appear to be declining, probably in part due to more people getting vaccinated. More ups and downs in infection rates could be in our future until the pandemic recedes.

Doctors, clinics and hospitals recognise that more COVID-19 surges are possible. They are working with manufacturers to stock up on equipment, and they are continuing their policies for protecting people.

The videos presented by some of our students of Apostolic Carmel High School articulate their views on 'How to face the third wave in COVID-19 pandemic times'.

They have highlighted the various precautionary measures required to be taken at our homes by every family member, in school by the students and in general by the public. Your decision to get vaccinated helps others too. Getting vaccinated can help protect you and those around you from COVID-19 .

Let's continue to take precautions to protect ourselves, friends and families even after vaccination. Let's strive to do everything that we can and drive transmission down, the virus will evolve if you allow it to spread .

By enhancing our knowledge and facing the challenges positively it'll help us to grow and learn to tackle this crisis.
